

## NEW: ARIES Jet Drive

The MOLABO ARIES 48 V electric drive and Kaiser LRHV Jet Drive form a compact, low-maintenance propulsion system for tenders, RIBs, and light motor boats.

### System Highlights:

- 50 kW at touch-safe 48 V DC – no high-voltage certification required
- Straightforward installation, service and maintenance
- Compact and weight-optimised jetdrive design
- Modular battery systems

### What benefits does the drive offer your customers?

- Very quiet and smooth operation
- Only one rotating part – extremely low maintenance
- High durability, quality and reliability

## NEW: ARIES Jet Drive

The perfect match for the MOLABO 48 V ARIES electric drive.

THE WORLD'S MOST  
**POWERFUL**  
**48 V**  
SAFE-TO-TOUCH  
ELECTRIC DRIVE

The Kaiser LRHV Jet Drive is designed according to the mix-flow principle. Unlike conventional axial-flow jets, its specially shaped impeller delivers a high water volume at very low rotational speeds, ensuring excellent efficiency and smooth operation – the perfect match for the MOLABO 48 V ARIES electric drive.

### Advantages at a glance:

- Very quiet and smooth running
- Outstanding maneuverability and agile steering
- No exposed parts below the hull – increased safety
- Ultra-light – drive unit weighs only 10 kg
- Only one rotating part – extremely low maintenance
- Minimal turbulence and cavitation
- No additional cooling pump required

Continuous power	50 kW
Voltage	48 V
Weight jet	8 kg
Weight motor	44 kg
Measures jet incl. motor	1105 x 272 x 454 mm
Space requirement in the boat	680 x 272 x 454 mm
Impeller size	135 mm
